DETAILED ACTION

Allowable Subject Matter

1. Claims 19-38 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or would not have rendered obvious: a system for allowing mobile reception of television broadcast signals, such as claimed in claims 19-38, the system: time synchronizing a plurality of different input signals using video synchronization pulses contained in the input signals; evaluating the quality of the input signals using at least one criterion for determining an adaptively determined weighting factor; weighting the input signals; and deriving an output signal using the weighted input signals. The closest prior art, Oshima et al (US 5,933,466) discloses a radio communications system for mobile communications system such as a car telephone system and a personal handyphone system, fails to anticipate or render obvious the present invention as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
